## The Canary In Mine Rescue Work

The canary bird is used in mine rescue work for the detection of the deadly carbon monoxide gas, to which he is very sensitive. After having performed his duty of warning the rescue crew of the limits of the life-threatening gases in the galleries, he is brought off duty and revived. He is shown in this illustration in the process of recovering from recent employment, sitting in his special cage and taking an oxygen bath. When photographed, the canary had about shaken off his unpleasant experience, and was becoming lively again.

## STAGE BEAUTIES POOR

## They Must Spend Their Money Living Up To Their Title.

THE worst affliction ever visited on me was when a theatrical press agent harled my pictures into the sanctum of a dramatic editor and dubbed me 'A Stage Beauty,' says Anne Meredith, who plays a prominent role in 'The Rule of Three.'

"This happened on my first engagement and the approbrium of 'stage beauty' has stuck to me ever since. I don't want it. I want to shed it. It not alone affects my reputation as an actress, but it is exceedingly costly. I have to live up to my title and in doing so every spare dollar that I have must go for clothes. If I attempt to stint my expenditures for gowns, people will immediately say 'Anne Meredith is getting very careless these days.' I suppose she no longer takes any interest in her work. And these same people are prone to remark when I do a particularly good bit of acting, 'Oh yes, she gets her jobs because she is a beauty.'

"I remember distinctly in one production with which I was identified I was given the part several months in advance of rehearsals. I studied that part as I have never studied before nor since. I did give a good performance, so much so that I was absolutely sure it would take me out of the 'stage beauty' class and obtain recognition for me as an actress of sincerity and ability. When I picked up the newspapers the next day to read the reviews, the hateful epithet 'stage beauty' still clung to me even though they did give me credit for good performance. 'Beauty and Ability' were coupled in the betting and according to the critics, ran a dead heat."

"If you will look over the records of professional stage beauties, you will find that not one of them saves a dollar nor are they ever given credit for good work. In fact, the only one who has made money is Maxine Elliott. I would rather be as homely as an acolyte, but have my work taken seriously by the public than as pulchritudinous as the entire combination of all the famous goddesses, nymphs and naiads who disported themselves on Mt. Olympus."

"I study just as hard and apply myself as closely as any other actress playing a similar line of parts and I want to be taken seriously. Another annoyance are the letters I receive from young girls who want the name of my dressmaker, where do I buy my hats, what face lotion do I use, am I on a diet and what is it; do I take cold baths in the morning or warm ones before retiring, what exercises do I recommend for the complexion, and a thousand other queries along similar lines."

"I want to get away from the necessity of spending all of my spare money for new hats and new gowns and if ever I get my hands on that press agent who started out to make me famous by calling me 'A Stage Beauty,' well, I am afraid I will have to answer to a charge of mayhem or some other horrible crime."

London, Eng., March 12.—Ambassador Walter Hines Page today received from secretary of state Bryan notification of the action of the United States senate in regard to his speech on the Panama canal and the Monroe doctrine, delivered before the Association of Chambers of Commerce on Wednesday.

"I see the ambassador says he was joking. Well, it strikes me that ambassadors of this government should not joke about matters which president Wilson said in his message might provoke war," he said.

**Thin Folks Who Would Be Fat**  
Increase in Weight Ten Pounds or More.

**A Physician's Advice**  
"I'd certainly give anything to be able to fat up a few pounds and stay that way," declares every excessively thin woman. Such a result is not impossible, despite past failures. Thin people are victims of mal-nutrition, a condition which prevents the fatty elements of food from being taken up by the blood as they are when the powers of nutrition are normal. Instead of getting into the blood, all the fat and flesh producing elements stay in the intestines until they pass from the body as waste.

To correct this condition and to produce a healthy normal amount of fat the nutritive processes must be artificially supplied with the power which nature has denied them. This can best be accomplished by eating a Sargol tablet with every meal. Sargol is a scientific combination of six of the best strength-giving fat-producing elements known to the medical profession. Taken with meals, it mixes with the food and turns the sugars and starches into rich, ripe nourishment for the tissues and blood and its rapid effect is remarkable. Reported gains of from ten to twenty-five pounds in a single month are by no means infrequent. Yet its action is perfectly natural and absolutely harmless. Sargol is sold by A. E. Ryan, El Paso and other good druggists everywhere and every package contains a guarantee of weight increase or money back.

**Caution:**—While Sargol has produced remarkable results in the treatment of nervous indigestion and general stomach disorders, it should not, owing to its remarkable flesh producing effect, be used by those who are not willing to increase their weight ten pounds or more.—Advertisement.
